0001	Serial Number, Binding to This Paper Content.
20170624	Paper Creation Date. Never Change.
r02	Paper Syntax and Semantic Error Correction Revision.
r02 date	20190411

Hello All, to spartancoin community.

I decide to do spartancoin coding. You can expect to see the project here:

xjail/spartancoin fossil: <https://www.fossil.tiv.cc/xjail/spartancoin>

(I personally build&test it on FreeBSD, and it works fine. You can clone it to your computer and build&test for your OS.)

SpartanCoin Xjail Home: <https://www.spartancoin.tiv.cc>

Plan

My plan is to make spartancoin development to be continued. The first stage is to fix bugs, improve code stabilities and code modernize, improve and optimize performance, find solution and make it extensible, and keep the current spartancoin specification. No more new features are planned right now, and no PoS fork is planned right now. These new features will be put into consider in the future, but not now, because I put the code stability into the first place.

Disaster Response

If the SPN exchange disappears from the market, the xjail spartancoin project will continue and the development works of xjail spartancoin will keep going on without affection.

Help

It is appreciated that you help SpartanCoin dev, business, market, etc.
